

IN THE SPECIFICATION

The Specification is objected to under 35 U.S.C. § 112, first paragraph, which requires the specification to be written in “full, clear, concise, and exact terms.” In addition, the Examiner indicates that the title of the invention is not descriptive and requires a new title which is clearly indicative of the invention to which the claims are directed.

Attached under separate cover are a clean and marked-up version of a Substitute Specification that corrects minor typographical errors, as requested by the Examiner. The title has been changed as per the Examiner’s request.
